DOCK SHELTERS WSTP-SERIES

Van Hybrid Dock Shelter

The Parcel Distribution Solution

STERIL
SUPERIOR SOLUTIONS BY
QUALITY PEOPLE

Superior solutions by quality people

The Stertil Group offers its customers worldwide customised, technologically sophisticated solutions for their dock equipment and heavy duty lifting requirements, including the best possible service from strong local partners. These superior solutions are conceived, developed and realised by a team of specialised professionals with unique experience. Thanks to its “quality people”, its total in-house production process and its international organisation, Stertil is a world leader in the field of Dock Levellers and Dock Shelters.

Fast, Safe and Durable

In the rapidly growing market of on-line services, parcel service companies are distributing a vast amount of goods 24 hours a day / 7 days a week / 365 days a year from dedicated and specialised logistics hubs. Often a beehive of activity where speed is of the essence and a specific dock solution is required that aids in the loading and unloading process allowing for a continuous and unbroken expedition of goods.

Whilst speed and efficiency are crucial, health and safety are essential.

Keeping personnel safe and well and the valuable stock damage-free are day-to-day challenges. The Stertil Dock Products WSTP Van Hybrid Dock Shelter offers a durable specialised solution for these demanding van and parcel distribution markets.

Perfect Docking - 180!

The WSTP Van Hybrid Dock Shelter is specifically designed for city vans that have doors which open flush with the sides 180 degrees for optimum loading and unloading.

The custom-made design of the WSTP is strong and soft cushions provide a complete seal between the van and the door for energy efficiency within the warehouse without damaging the vans.

Protection against the elements

The WSTP Van Hybrid Dock Shelter has a roof for weather protection against wind and rain. Manufactured from, high quality performance materials resistant to chemicals for example, aggressive cleaning materials and diesel as well as mold caused by damp or wet conditions. The back plates of the WSTP are zinc-coated preventing corrosion.

The strong but soft foam cushions have 98 per cent compression recovery. The flexible foam has a unique structure allowing the system to compress and recover in response to applied pressure; so firm and at the same time flexible preventing either damage to the dock shelter or the back of the van.

Fast, efficient and safe in use

Open-aspect design with a third eye

The trapezium open-aspect design and the built-in recess in the top cushion, housing a rear-view camera, are two features assisting the van driver in aligning the van accurately onto the dock.

The Magic Cube Folding Door

The WSTP Van Hybrid Shelter, is more than just a shelter it is a complete system. The cleverly designed cube folding door, offers space-saving functionality by conveniently folding-up above the shelter, allowing for an optimum use of the available warehouse space.

Cleverly designed folding door

Special recess for cameras

Options

- Reinforced wear plates on the side cushions for extra durability
- Additional inflatable top cushion for smaller sized vans
- Bottom cushion for additional dock-van sealing
- Adaption frame designed for distribution centres or parks with inclined or declined approach (ramp)

The Parcel Distribution Solution

- Perfect docking for Courier & Parcel Service vans, such as the Mercedes Sprinter and VW Crafter
- Special recess in the shelter top cushion for cameras
- Special WSTP roof against wind and rain
- Open-aspect of shelter allows full visibility for driver
- Suitable for city vans with door openings of 180 degrees
- Soft but strong foam, preventing vehicle damage and offering a perfect seal
- Optional reinforced side pads with wear pleats for extra durability
- The Cube Folding Door provides a clean and compact installation without ceiling rails

Inflatable top cushion for smaller sized vans

Special WSTP roof against wind and rain
